

# Working at heights safely

## NATIONAL

THE Beaver Group was established in 1978, initially providing mooring solutions for the marine industry.

Over the last 40 years the Beaver Group has evolved into a multi business group focusing on various industries, including mining.

One of its businesses, Life Line Easy Hire, is the first ever hire company providing a specialised engineered height safety solution, from as little as \$100 a day.

Life Line Easy Hire's range includes three mobile trailers, reaching from 7 metres to 12 metres, and three portable systems ranging from 4.5 metres to 12 metres.

Another division is Beaver Technology Services (BTS), which is an engineered height safety systems supplier.

BTS was established in 2010 to provide practical and innovative height safety solutions for industrial fall protection applications, including working at heights and confined spaces.

The company's range includes harnesses, davits, tripods and engineered solutions.

BTS has also been the Australian distributor for the German built Liftket electric chain hoist for many years.

With a range of 250kg to 25 tonne, electric chain hoists in single and three phase lifting solutions.

BTS are industry leaders in engineered height safety and lifting solutions.

Smith Lights also provides innovative lighting solutions for the industrial market.

The company specialises in portable emergency lighting systems with up to

24-hour run times, and its products are exported all around the world.

The Beaver Group of companies maintains the highest quality standards in all its product offerings, which is

supported by ISO9001 certification, and NATA laboratory accreditation to meet the relevant Australian standards.
